

CMMMLWiki: Activity

- Project aim:
 - Personal video blogging
 - Annodex media content management system
- Features:
 - online annotation editing, search
 - media upload
 - RSS feed, OpenSearch RSS

CMMMLWiki: Challenges

- Cortado: Java video playback plugin is great but subject to JRE flakiness
- General Web 2.0 issues: interface latency, JavaScript security etc.

CMMMLWiki: Dependencies

- Libraries in use:
 - libogg/liboggz/libannodex/pyannodex
 - Prototype and Scriptaculous JavaScript libraries
- Projects dependent upon:
 - HTTP server
 - Cortado
 - GStreamer or Mplayer

CMMMLWiki: Next Steps

- Transcoding upon upload
(ffmpeg2theora/GStreamer)
- Video editing (probably via hogg or cogg)
