Opera @ FOMS

The Best Internet Experience
On Any Device, Anywhere

(Yep. We make Web Browsers)

We think that it is time to make video a first-class part of the
web. That means it has to be available to everyone,
everywhere, to produce as well as consume

Challenges

- Multiple platforms
- Web standards
- Patent and licensing stories
- Authoring tools are critical

Dependencies

- W3C and the politics therein
- The technology

But also

- Content producers
- Other implementors

Next steps

- More test releases
- Continue looking at legals
- More standards work (meetings and blabla)
- other devices
