Opera @ FOMS 2009

"The Best Internet Experience
On Any Device, Anywhere"

(Web Browsers, on anything)

We want video ...

... in HTML and [SVG](SVG)

Challenges

Patents and licensing

(and Competition and FUD)

Multiple platforms

Web standards, Accessibility

Commercial requirements

Authoring tools are critical

Dependencies

The lawyers

The customers

Engineering (the easy bit)

But also

Content producers

Other implementors

Next steps

Continue looking at legals :(

More standards work

Release with HTML5 `<video>`

other devices

More Ogg test releases?
