

# ffmpeg2theora: Activity

- Project aim:
  - easy commandline theora encoder
  - static binaries should run cross platform and allow anybody to encode a theora video
- Features:
  - support all formats supported by ffmpeg as input
  - easy to use

# ffmpeg2theora: Challenges

- keep in sync with ffmpeg api

# ffmpeg2theora: Dependencies

- Libraries in use:
  - libogg, libvorbis, libtheora
  - ffmpeg

# ffmpeg2theora: Next Steps

- should it be ffmpeg2ogg and add support for dirac, flac, speex?
- preview images for visual feedback in applications using ffmpeg2theora like Firefogg
