

oggz : Activity

- Project aim:
 - A library for handling the Ogg container
 - Tools for manipulating Ogg files
- Features:
 - Seeking
 - Parses codec headers
 - Validation

Conrad Parker (kfish)

- kfish on irc.freenode.net, kfish.org
- Annodex/Xiph: [liboggz](#), [libfishsound](#), [libannodex/mod_annodex](#), [cmmlwiki](#)
- Linux-audio: [sweep](#), [libremix](#) (metadecks.org)
- Renesas: hardware codec libraries, OpenMAX for SHMobile, UIO device sharing

oggz : Challenges

- Liboggz is pretty stable
- Tools are in ok shape
- Integration testing with metavid etc.

oggz : Dependencies

- Libraries in use:
 - libogg
- Projects that depend on us:
 - Oggplay (-> Firefox)
 - Oggz-chop (-> Metavid, Archive.org)

oggz : Next Steps

- Release 0.9.9 (Dirac support)
- Some seeking fixes, optimizations
- Oggz-chop: Annodex caching headers
- Release 1.0
